

INotifyPropertyChanged

```
classDiagram
    class INotifyPropertyChanged
    class ViewModelBase
    class EnvironmentViewModel["ChamiUI.PresentationLayer.EnvironmentViewModel"]
    EnvironmentViewModel --|> ViewModelBase
    ViewModelBase --|> INotifyPropertyChanged
```

The diagram illustrates a class hierarchy. At the top is the `INotifyPropertyChanged` interface. Below it is the `ViewModelBase` class, which inherits from the interface. At the bottom is the `ChamiUI.PresentationLayer.EnvironmentViewModel` class, which inherits from `ViewModelBase`. The inheritance is shown with blue arrows pointing upwards from the child classes to their parents.

ViewModelBase

ChamiUI.PresentationLayer.
ViewModels.EnvironmentViewModel
